AB - J05117158 The compsn. comprises 0.1-100 wt.% (3.5 wt.%)
of artificial natural seawater salt or sodium chloride.
- The pref. dosage forms are e.g. creams (face) lotions,
shampoo, milk lotions, cleansers, packs, soap,
ointments, pastes, tinctures, liniments, gels aerosols
and baths salts. The artificial seawater salt may be
used for hatching sea urchins and comprises 60% of
sodium chloride, 15% of sodium sulphate, 5% of
magnesium sulphate, 4% of calcium chloride, 2% of
potassium chloride and 14% of the balance. The natural
seawater salt is prepd. by salt pans.4 USE/ADVANTAGE -
Used to treat atopic dermatitis, dermatophytosis,
eczema, urticaria and itchiness without side effects.
- In an example, to purified water (82 wt.%) artificial
seawater salt(3 wt.%) was added and heated to 90 deg. C
to give aq. phase. Squalane (10 wt.%) and glycerin
fatty acid ether(5 wt.%) were heated to completely
dissolve and mixed. To the mixt. the aq. phase was
added in small portions with slow stirring for
emulsification while maintained at 70 deg.C to give
100wt.% of the cream. (Dwg.0/0)
